

COVER WITH STROKE LIMITER Model : CVC*TSX

Ref. No. D 03438
Release 11 / 2025

ENGINEERING - 1 of 2

A Polyhydon Group Company

Description

The Covers with Stroke limiter model **CVC*TSX** are designed to hold polyhydon make Cartridge valves model **CV***** in cavities machined as per ISO 7368, and provide facility to control the oil flow passing through these cartridges.

The flow passing through the cartridge can be controlled by controlling the opening of the poppet by means of a Stroke limiter screw provided in the cover. The throttling is effective in either directions.

Clockwise rotation of the Stroke Throttle screw will decrease the flow passage, thereby decreasing the flow.

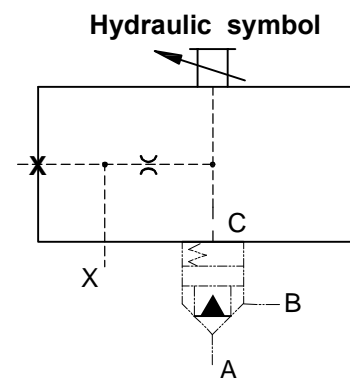

A check nut is provided to lock the Throttle Screw in its position.

A soft rubber cap prevents accidental damage to the Throttling Screw.

These Stroke limiters are more effective with cartridges having poppet with cushion nose.

Section

Technical specifications

Mounting interface	:	As per ISO 7368
Working pressure	:	350 bar.
Hydraulic medium	:	Mineral oil.
Temperature range	:	-20 to + 80°C.
Viscosity range	:	10 cSt to 380 cSt.
Fluid cleanliness required	:	ISO 4406 20/18/15 or better.

Unit dimensions

Dimensions in mm.

Note:

Mounting interface for cover as per ISO 7368, for dimensional details and engineering data refer Cartridge valve data sheet D03426.

* Cover fixing S.H.C Screws are **OUT OF SCOPE OF SUPPLY.**
